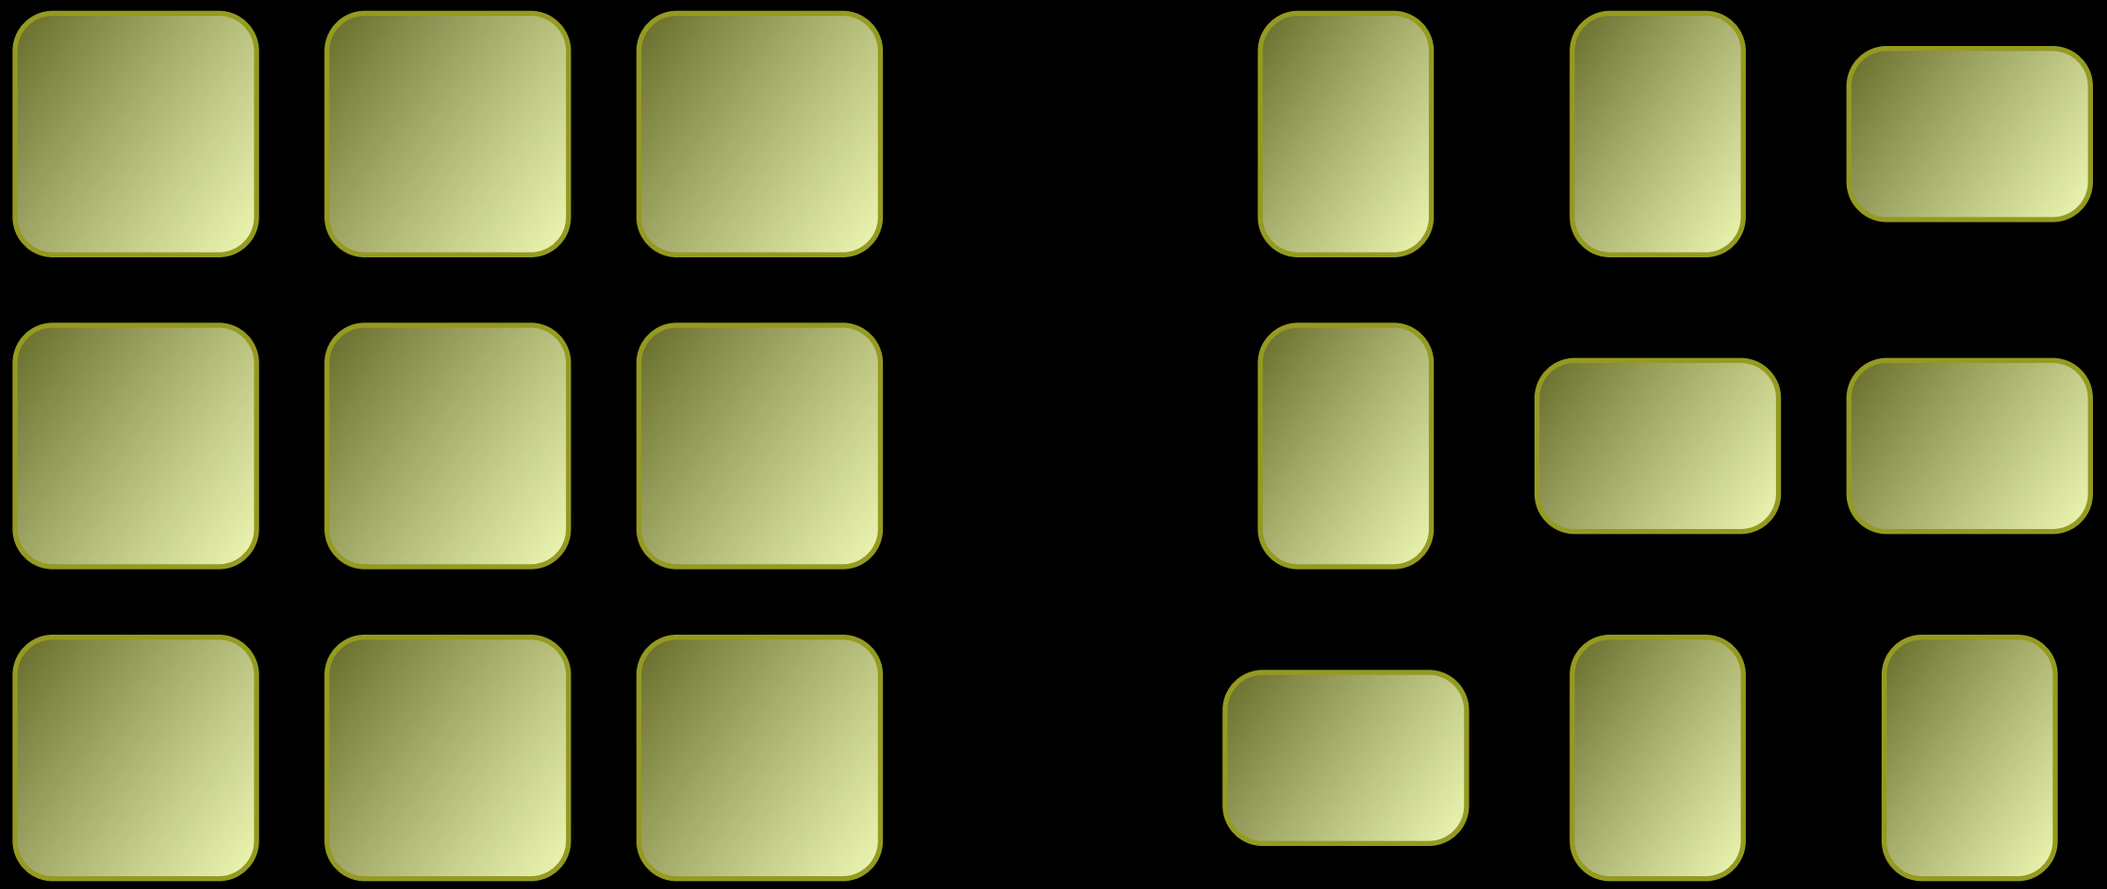
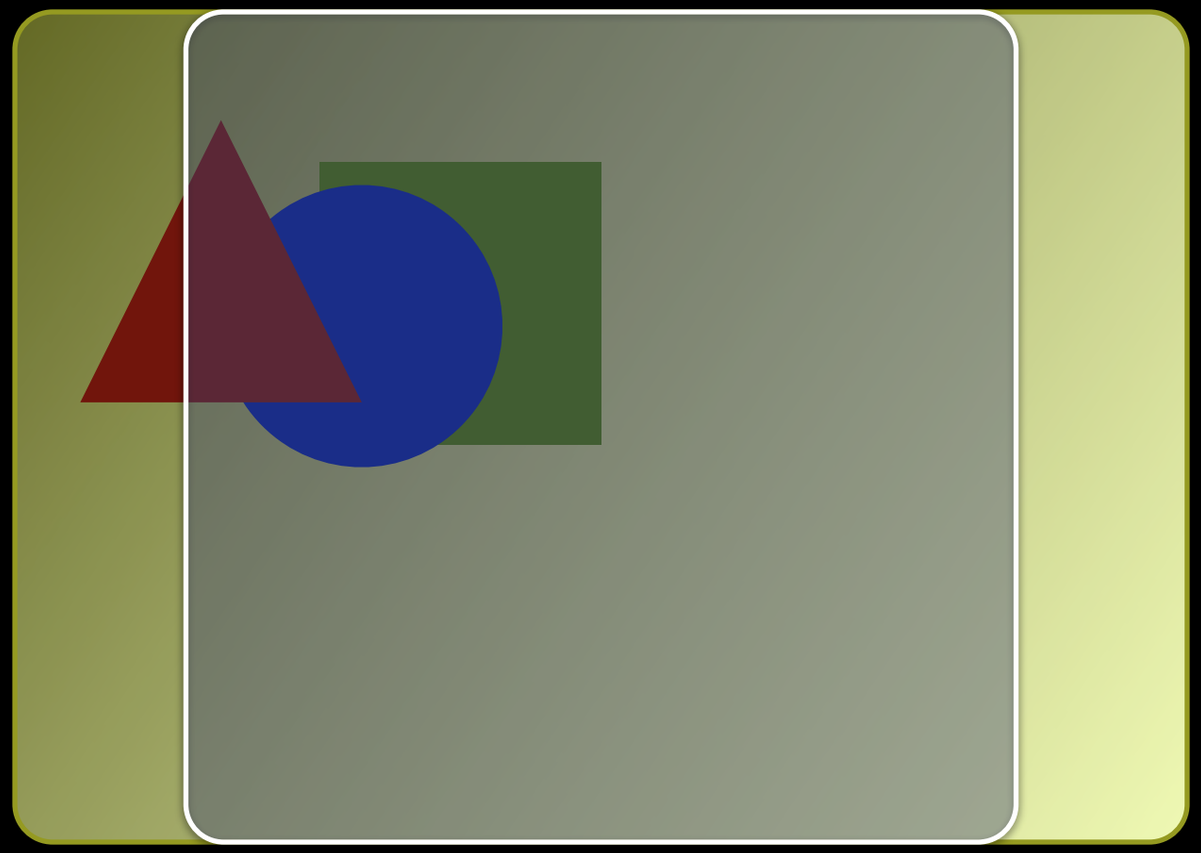
London Wicket
4 June 2008

Alastair Maw
HereBeBeasties.com

Be square.

Square thumbnails rock.
Unfortunately, they need humans.





Here's one I prepared earlier.

org.londonwicket.cropper.**CroppableImage**

Let there be light.

LightWindow v2.0 from **stickmanlabs.com**.

Lightbox JS

lightbox

Lightbox JS by Lokesh Dhakar

OVERVIEW

Lightbox JS is a *simple, unobtrusive* script used to overlay

press x to close

BENEFITS

Places images *above* your current page, not within. This frees you from the constraints of the layout, particularly column widths.

Keeps users on the same page. Clicking to view an image

LightWindow v2.0

```
<script type="text/javascript" src="lightwindow.js"></script>
<link rel="stylesheet" href="lightwindow.css" type="text/css" />

<a href="foo.jpg" class="lightwindow" >
   <img src="foo-thumb.jpg" rel="gallery[category]" />
</a>
```

Demonstration

Where's the bar?

Photos are HTTP uploaded using a **FileUploadField**.

UploadProgressBar gives us shiny AJAX baubles.

A word is worth 1,000 pictures.

In-place caption edits are trivial using **AjaxEditableLabel**.
(wicket-extensions)

tread

Sorted.

org.londonwicket.listeditor.**ListEditor**

Looking your best.

Resampling issues.

Unsharp masks.

JPEG quality.
